25X1

1. The aircraft type shown was seen at the Tbilisi (44°53'E, 41°40'N) plant and from the southeastern exit of the plant. 25X1
2. Most of these turbojet fighters were two-seaters, but some were single-seaters.
3. The nose of the jet engine was closed by a red cap.
4. After being tested at the factory field located to the south-east or east, the aircraft were returned to the plant, crated, and then shipped by rail.

Comment:

25X1

Report confirms previous information and is considered credible. It contains no new information, since nothing is said on the arrangement of the seats in the two-place version of the jet fighter, and the observations cover only the aircraft traffic seen between the plant and the factory field.
